

Saree Draping

Overview:

Draping the oh-so-difficult-to-tame garment the Saree - is an art. An art that all Indian working women must acquire. Draping sarees in perfect style requires a lot of practice and technique. A saree when draped properly makes a woman look more stylish, elegant, graceful and sensuous but a clumsily draped saree can equally bring down the look of the saree and spoil the whole appearance of a woman and may lead to horrendous wardrobe malfunctions!

There are so many different ways how a woman can drape her sari. It is the drape which brings out the elegance and class associated with saree draping. Therefore it is important to understand the different forms of draping the nine yards of fabric.

By the end of the workshop the participants will have confidence, a winning edge and create lasting impressions on the onlooker. They will embrace their inheritance and natural identity. And rather than struggle with it awkwardly they would wear with pride what is a symbol of all that is graceful and beautiful – the eternally elegant saree.
